sequence, the pulses being arranged in packets of predetermined configuration with gaps between the packets, and the timings of the pulses within each packet being such that each packet has a narrow autocorrelation sequence, and wherein each waveform is randomly selected from a set of waveforms with respective predetermined characteristics as operatively interconnected and functionally claimed. Clearly the prior art does not provide for the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
